Services

Petroleum Transportation

Transportation of petroleum products along the waterways of the Russian North by oil tankers and oil tankers. One of the main types of cargo transportation of the Rosneft Trans shipping company.

Transportation of timber

Transportation of timber (round, processed and string) on river vessels and timber along the waterways of the Rosneft Trans group of companies - direct from the gate transportation of the Rosneft Trans shipping company.

Coal and Bulk Cargo

Coke, coal, cinders, salt - all these ingredients of bulk and liquid cargo on the Black Sea are carried out by the Rosneft Trans Pipeline Company. Transportation of these goods is necessary for the normal functioning of the foundry, metallurgical and construction production in the north of the region. Local authorities and consumers prefer to use solid fuel for heating during the winter period.

Oversized cargo

Some types of industrial equipment or technologies of industrial enterprises can only be transported by road transportation due to the exceedance of permissible dimensions or weight. Thus, the delivery of cargo to Krasnoyarsk is limited by the rail road's capacity due to the length, height, width and height of cargo items to current collective bearings installed on a track, etc.

The container transporting

The transportation of goods in containers is a highly efficient way to move goods within a single transport network, ensuring maximum safety of the cargo being transported and implementing advanced technologies of the transport process.

Container shipping involves: seagoing, and railroads, Services for receiving, transhipment, trans-
